

1976 FORD GRAN TORINO \$4500 OBO

- 100,104 Original Miles
- V8 351M Motor
- 4 Door Sedan
- C4 Automatic Transmission

I am the second owner (15 years). The car is completely original, including the 351 modified motor. **THIS CAR RUNS GREAT!** The car is regularly serviced. The last service included a new heater core and water pump. The transmission shifts smoothly with **NO** slippage. The front end has been rebuilt. The car does have a/c, but the compressor needs to be rebuilt/replaced. The tires have very little wear. The body is virtually rust free. It has spent all its life in the south, thus not effected by road salt. There is body damage on the front left fender and on the lower right fender. All original interior, which is almost flawless other than tears in the driver side seat, three small cracks in the vinyl dash (have been there since I have owned the car) and the back speaker panel needs to be replaced. The glass is all original. This car is garaged and from a non-smoker household.

I have all the service records for this car (since I have owned it), as well as, the original owners manual.

This would make a great restoration project with a great running motor. I love this car and wish I had the time to restore it back to showroom quality. I hope it will find a good home and get the attention it deserves.

Please email at burm@mcmo.net or call 573-870-0674/573-663-3724 for more info. I can also send additional pictures.

Thanks for looking!
